- HTML
- CSS
- JavaScript
- Basic React
- Communication

PROJECTS

1). Current Weather App

Current Weather App is a responsive web application developed using HTML, CSS, and JavaScript. It provides real-time weather information by integrating a weather API, allowing users to search for any city and view details such as temperature, Feels like, and weather conditions. The project focuses on API integration, responsive design, and creating a clean and user-friendly interface.

2). Tic-Tac-Toe Game

Tic Tac Toe is an interactive web-based game developed using HTML, CSS, and JavaScript. It allows two players to play alternately on a 3×3 grid while automatically detecting winning combinations and draw situations. The project demonstrates DOM manipulation, game logic implementation, event handling, and responsive user interface design.

3). Personal Portfolio Website (In Progress)

Personal Portfolio Website is a responsive web application currently under development using HTML, CSS, and JavaScript. The portfolio is designed to showcase my projects, technical skills, education, and contact information in a clean and professional manner. The project focuses on responsive design, modern user interface development, and creating an engaging user experience across different devices.
